

V Codes for Fertility Preservation

- V26.42 Encounter for fertility preservation counseling
- Encounter for fertility preservation counseling prior to cancer therapy
- Encounter for fertility preservation counseling prior to surgical removal of gonads
- V26.82 Encounter for fertility preservation procedure
- Encounter for fertility preservation procedure prior to cancer therapy
- Encounter for fertility preservation procedure prior to surgical removal of gonads

There are also some non-specific V codes that can be used for the rheum and MS patients.

Always use the CANCER diagnosis as the PRIMARY diagnosis and then the V code as the secondary!

Remember, these patients are NOT infertile so an infertility diagnosis should not be used.
