1st Symposium of Oncofertility
June 21, 2018,
Mahak charity & Royan institute, Tehran, Iran
Royan Symposium on Oncofertility was held on 21 June 2018, Tehran, Iran. The symposium was the joint organized by Royan Institute and cooperation of Supportive care hospital for cancerous children (Mahak Charity).

The symposium of Oncofertility enjoyed the collaboration of a scientific and executive team form Royan Institute, including Rouhollah Fathi (PhD) as the executive secretary; Bita Ebrahimi (PhD) & Firouzeh Ghaffari (PhD) the joint scientific chairpersons and, Somayeh Tavana (PhD) executive secretary respectively.

The symposium intends to join measures between diverse medical team members to preserve reproductive ability in adults as well as immature males and females, through:

• promoting the scientific level of the relevant profession,

• developing orientation and information exchange among researchers and experts.

• Enhancing and empowering of knowledge and scientific experiences. among Gynecologists and Oncologists in regard with preserving fertility.

The recent symposium addressed basic scientific and clinic themes in cancer patients. The meeting was attended by scientific, medical clinical experts and researchers from the various fields of, embryology, oncology, gynecology, andrology, epidemiology and some researchers in reproductive fields.
The aim of this symposium is that, hopefully; in cooperation with specialists from all over the country, it will continue to inform patients and participate in the scientific discussions of the working group.
