The Oncofertility Consortium has a NEW Fertility Preservation Resource for Genetic Counselors!

61% of cancer genetic counselors participating in a research study reported patients have brought up their fertility concerns during a session¹. Visit us online at http://oncofertility.northwestern.edu/genetic-counselors to prepare yourself for fertility preservation discussions and learn more about the critical role genetic counselors have in oncofertility care.

We created an Oncofertility Decision Tool Web Portal for genetic counselors! Our web portal is a library of oncofertility resources, such as:

- Communication strategies for discussing fertility preservation options with patients of all ages and their family members, including resources specific to high-risk patients
- Decision Aids and Tools for facilitating fertility preservation decision-making
- Up-to-date information on fertility preservation techniques and technology
- Patient educational resources (print & online; English & Spanish)

The Genetic Counselor Resource Page also provides access to:

- Virtual Grand Rounds
- Provider Pocket Guides
- Summaries of Non-Malignant Conditions
- Billing and Insurance Information
- The National Physicians Cooperative- a nationwide network of fertility preservation providers
- The Oncofertility Consortium Blog
- Community and Online Support Resources for Your Patients

To refer a patient for a fertility preservation consultation, or request more information, call the Oncofertility Consortium FERTline at 312-503-FERT or 866-708-FERT.
